

"Careless sex is an apple with a worm in it" (Geshektler)
You couldn't help yourself but to bite into it.
Afterwards you noticed the apple tasted
like a germ.
Then you glanced at it, and noticed the
worm.

You tried to spit it out, but you already
swallowed it.

You tried to throw it up and all that
comes out is spit.

All of a sudden you feel sick,
because of the apple you picked.

That Rot inside while laying on the
ground.

Out of all the apples that were falling
down.

You could have picked any apple to bite
into,

But that one looked big, red, shiny,
and new.

Looks deceive.

That apple ~~got~~ with ^{the} a worm you bit
~~into~~ turned into HIV.
